ABSTRACT

A cultural and linguistic textbook on the Tolowa Indians of Northwestern California and Oregon provides a history of the tribe, a Tolowa Unifon chart and pronunciation guide, map of tribal lands with place names in Tolowa and English, stories, prayers, songs, genealogy, commonly-used words grouped topically, explanation in English of cultural activities, a dictionary (the longest section of the book), paradigm charts, and sample sentences. The tribal history describes the evolution of a written Tolowa language and the community effort to collect and preserve a vanishing culture. The map provides locations and names of Tolowa villages in English and Tolowa and accompanying lists provide names of rivers and other geographical entities in both languages. Eight stories, prayers/scriptures, and songs are in Tolowa with literal English translation. A tribal genealogy lists individuals by Tolowa and English names and provides a list of kinship names. Sections for commonly-used words include flora, fauna, counting, money, time, the 13-month lunar calendar, tools/implements, house interior with illustrations, feather dance clothes, baskets and instructions for basketmaking, body parts, and games/recreation with explanation of game rules and equipment. An alphabetically arranged English-Tolowa dictionary contains approximately 3,360 terms. Sample sentences in Tolowa are arranged alphabetically by first word with English translation. (LFL)

DEDICATION

WE DEDICATE THIS BOOK TO THE GREAT IDEAS WRITTEN HEREIN. THEY WERE BORN OUT OF THE LOVE OF OUR ANCESTORS FOR THIS LAND. THEY WERE HERE BEFORE OUR FOREIGN NEIGHBORS ARRIVED, AND THEY HAVE SURVIVED THE NEWCOMERS' FRIENDSHIP. THIS PROVES THAT WHAT IS MEANT TO LIVE WILL NEVER DIE.

INTRODUCTION

In the beginning, there was nothing. Three grew, Baby Sender, Daylight, and Thunder. Daylight opened the Sweat House door and daylight became. Baby Sender said, "Let's make the ocean first," then he spat down. Then he asked Daylight, "Isn't there a world to come?" Daylight answered, "Yes." The Earth came sliding from the South upon the watery deep. Baby Sender saw footprints in the new Earth. This would be the cause of trouble in the World. The Earth was going to be piled up in one place. Everything coming will grow there. A White Redwood tree stood there as the Earth slid forth. The first wave came up and turned over upon the shore. The fish swarmed to the surface of the water and departed into all forks of every river. The Birds came up together, the sound of the Geese echoed through the sky. Everything ran forth upon the Earth, Bobcat turned over first. Finally, they succeeded in making a person. She was a beautiful woman who became the wife of Daylight. They and their sixteen children would become our ancestors. They would come to speak different languages. With the waters and Earth placed, all things created, and his law set down, Baby Sender said, "Farewell," and ascended unto the heavens.

There was a time when the people did not obey the laws of God. The World was flooded with a great tidal wave, then torrential rains. Only a young man and woman made it by orders of their adopted grandmother, to the top of EŃ-Mʎ (1). The animals also gathered for their lives at EŃ-Mʎ . The mountain top floated upon the waters. It came to rest in Elk Valley. The animals ran away and the couple returned to ɔIT (2). There they found nothing of their prior life. Many lay dead upon the Earth. They built a simple hut to live in. One day while fishing, a woman came paddling from the South. With these three people the new generations began.

One time people came down from the North in great canoes. They subdued the warriors and made slaves of the people. The invaders became fat and lazy because they did not work. The conquered people became weary of their treatment. One evening during a large celebration, many packed and moved into the eastward mountains to start a new life.

(1) EŃ-Mʎ = Mt. Emily on the Chetco River
(2) ɔIT = A village at the mouth of the Chetco River

One day during 1853 a man saw two soldiers fighting at Lake Earl. One soldier killed the other. When the witness returned to YON'-DÓ-KUT (3), he expressed concern that our people would be blamed for the soldier's death. That Fall, many gathered to attend NÉ-DOS (4). There the local minute-men militia fell upon YON'-DÓ-KUT. 450 of our people died there. The slough ran red with their blood. The flames of the burning houses reached higher as even the babies were thrown to their deaths. The next season, in 1854, NÉ-DOS was held at EÉ-ƆƱ-LET (5) because YON'-DÓ-KUT had been burned. From that massacre, YON'-DÓ-KUT was given the nickname "Burnt Ranch". Again at EÉ-ƆƱ-LET the horror of YON'-DÓ-KUT was reinacted with seven layers of our people burned in the Dance House.

In the following year, the Chetco/Rogue River Indian War erupted. A battle in 1855 claimed seventy lives at XÓ-WUN'-GWÚT (6). In the years 1852 to 1856, 650 of our people were driven to Wilson Creek. They were promised land for cultivation if they would secede from their lands. On March 3, 1855, action was taken to establish a reservation in Smith River Valley. At that time many Wiyot people of Humboldt Bay were brought to Smith River. Later, they were told they could return home. They packed and elatedly began their departure. As they departed, they were gunned down as escapees. During 1856, 126 Crescent City people were imprisoned on Battery Point Rock for one year. Later, in October, others were placed on "Smith Island" under the control of Hezekiah Gardner. In early 1857, the people at Wilson Creek were moved to Ft. Terwer in Klamath. Then, by August they were relocated to Waukell Creek. On May 3, 1862 the Smith River Reservation was formally established and four to five hundred of our people were brought from Waukell Creek. Later, on July 27, 1867, the Smith River Reservation(7) was discontinued. The following year our people were removed to Hoopa Valley. They were taken there up through High Divide, then along Rattle Snake Ridge and brought down at Weitchpec. A majority of them ran away and returned to the Smith River. Others stayed there to become part of those people. Later, in 1860, at the end of the Chetco/Rogue River Indian War, 600 of our people began the long trek which ultimately took them to Siletz, and some to Warm Springs and Umatila Reservations in Oregon. The people were driven as cattle to Battle Rock at Port Orford and placed there for nearly a year. The brutalized and subjugated survivors were then herded onward toward the reservations. Those who hid in the nearby hills during the Siletz roundup returned to live at STÚN-DOC-ON' (8), YON'-DÓ-KUT, NÍИ-LI-ƆÚN-DUN (9), EÉ-ƆD-LET, MÉCП-TÉП-DUN (10)TO-NIИ'-ƆÚN-DUN (11), and EŃ-ƆWO (12). Of the estimated 2,000 indigenous people, only 121 were censused in 1910.

With the assignment of land, came the contemporary land base for NÍИ-LI-ƆÚN-DUN in 1894. STÚN-DOC-ON' began to erode away in 1903. The government bought two tracks of land under the Landless California Indians Act in 1906. These became the Smith River and Elk Valley Rancherias. By 1908 the cemetery of STÚN-DOC-ON' had been relocated to the mainland. Only two houses remained on STÚN-DOC-ON'. In 1910 the last ten day NÉ-DOS was held on STÚN-DOC-ON'in LonghairedBob's plank house.

The continued appropriation of the land was further perpetuated in 1913. The EÉ-ƆD-LET and MÉCП-TEП-DUN people were forced to move to "B" Street in Crescent City on the threat of losing all their children to boarding schools. The indigenous occupation of YON'-DÓ-KUT came to an end with the death of Rawleigh Grimes in 1952. By 1913 the majority of our people were living at Smith River Rancheria, Nelechundun, Elk Valley Rancheria, and Crescent City, with a small number at Wagon Wheel, Big Flat, and Gasquet.

During 1927 the Tolowa healing and spiritual practices were supported and perpetuated through the Indian Shaker Religion which came to us through our linguistical cousins from Siletz. The Church was started in 1928 and completed in 1932, where it stands today.

The Del Norte Indian Welfare Association was established in 1929. The organization's purpose was to continue the tradition of people gathering together and helping one another. During the 1950's and 60's, the death of each elder made more imminent the loss of tribal knowledge and language. This started a concerted effort to find a way to write and record the language, literature and culture for future generations. In 1968 a newspaper article in the *Times Standard* featured Tom Parsons (Center for Community Development Director) writing the Hupa language with a new alphabet. He was contacted immediately by Eunice Bommelyn.

Language classes with our elders began at Del Norte High School in 1969. Tom Parsons brought Amelia Brown to these classes weekly from Orick where she was living with her daughter, Berniece. Sam Lopez, Ella Norris, Irene Natt, Goble Richards, and Ellen LaFountain were our primary resource people. At that time, in a general concensus, we decided to also employ the Unifon Single-Sound Alphabet as the means of writing our language. This strengthened the on-going resurgence of interest in cultural activities that included singing, dancing (and their supportive philosophy), the carving of magnificent redwood dugout canoes, classes in traditional costumery and food preparation, and the authentic reconstruction of ancient villages upon their precise sites from ancient times.

Grandparents, parents, and their children attending the regular "Language Meetings" often represented an age span of one hundred years; and such pan-generational teaching-learning groups -- so typical of the interrupted tradition of Indian education, but so rare in contemporary education -- have continued constant whether classes are held on week-ends or evenings or as credit-bearing components of the day-school curriculum. Class members' loyalty has been overwhelming. Week after week in Crescent City and Smith River, California, Tolowa adults and children of all ages met for the patient tutelage offered by tribal elders Amelia Brown, Ella Norris, Goble Richards, Ellen LaFountain, and others -- under the proud and loving guidance of spiritual leader Sam Lopez.

In early 1970, language writing and teaching programs were requested and begun at Trinidad Elementary school for Yurok language, and at Del Norte High School for the Tolowa language. Today, these programs have transmuted precisely as intended into credit bearing curricula of secondary and elementary schools in Del Norte County and of the regional community College of the Redwoods.

The Foundation for a Consistent and Compatible Alphabet (F.C.C.A.) contributed a specially built Unifon typewriter to the Center for Community Development. Subsequently, I.B.M. Selectric elements were cast in the Indian Unifon orthography, and with their help text-book-lexicons were completed for classroom use in the Hupa and Yurok languages. This Tolowa textbook is the third; and a Karuk text will soon be the fourth.

In 1971 Elmer Jarnaghan and Eleanor Abbott, two native Hupa linguists who worked with the Indian Language program from the beginning, were granted the first credentials under the California Teacher Certification Code's "Eminent Persons" clause as public school teachers of American Indian Languages & Literature (Hupa). Subsequently similar credentials were achieved for Mrs. Berniece Humphrey to teach Tolowa in the Del Norte (County) High School; for Mr. Jimmie James to teach Yurok in the Klamath-Trinity Schools; then for Mrs. Jessie Exline to teach Yurok Language and Literature in McKinleyville High School, and for Mrs. Viola Richards to teach Tolowa in the Smith River Elementary School. Recently, in 1978, Mrs. Gladys Guy, tribal Chairperson, and Mr. Shan Davis, traditional spiritual leader of the upper Klamath River Karuk tribe were issued State Eminence Certification to teach their very ancient language and literature in the elementary and secondary schools of Happy Camp , Siskiyou County. Loren Bommelyn, a descendant of Nelechundun, attended Humboldt State University for five years, earning a B.A., and finally a single subject teaching credential with an emphasis in Humanities/Cultural Studies in 1980. He currently offers instruction of the Tolowa Language and Culture from elementary to the university levels.

In 1973 the Center for Community Development's Director, Tom Parsons, won the National University Continuing Education Association's highest national award (for "Innovative Programming") for *Indian Community Development through the Regeneration of Native American Languages and Literature.* This was followed in 1980 by N.U.C.E.A.'s Annual Award for *Innovations in Design and Implementation of New Methods for Improving Community Development*; and in 1983 by N.U.C.E.A.'s Division of Special Certificate and Degree Programs' Annual Award to the Center for the design and development of the *American Indian Languages and Literature Bilingual Education Teacher Preparation and Credentialing Program.*

This text represents an arduous journey of the Tolowa Language from the spoken to the written. We present this as an auspicious beginning.

ELDER CULTURAL CONTRIBUTORS:

Amelia Brown, YÓ-GWUT-DɅ́-NO of ΠTRÚS-ME', matriarch of the Tolowa Nation and undoubtedly the most important contributor to this text, left us and this world March 25th, 1979 at 110 years. Born just fifteen years after the world-shattering Yontocket Massacre, her clear memory and

articulate narratives came close to yielding an encyclopedia of life as it was before the white invasion. Once when asked: "Grandma, why haven't you told us this before?" she answered: "Because no one ever asked me before!"

Sam Lopez, XÍ-LIS of XÓ-WUN'-GWÚT, principal spiritual leader of the Tolowas and scion of traditional headmen of the village of Howonquet, stimulated and organized the resumption of cermonial dancing, gaming, and related cultural acitivites. The chief inspiration of his people in this renaissance for all of his life, Mr. Lopez left us on October 24, 1977 at 91 years.

Ella Norris, NONᴨ-ƆÓ-DRE' of DOH'-TIИ́'-DUN, born a Tolowa-Yurok in 1895, was to our knowledge the last remaining fluently tri-lingual Northwest California Indian when she left us on July 31, 1982 at 87 years. A deeply spiritual person, and one of the finest traditional basket weavers, Mrs. Norris was the chief contributor to the section in this book on collecting basket-weaving materials.

Ed "Goble" Richards, ᴨLÓ'-DUN-TÉC-NO of XÓ-WUN'-GWÚT, constant companion and "deputy" of spiritual leader Sam Lopez, chiefly contributed correction, approval, and authenticity to the cultural recollections of which this textbook is made.

Other elder cultural contributors without whose often unique gifts this book could not have been written include: Laura Scott Coleman of NÍИ-LI-ƆÚN-DUN; Berneice Brown Humphrey of YON'-DÓ-KUT; Ellen White La Fountain of EÉ-ƆƱ-LET; Edward Lopez of XÓ-WUN'-GWÚT; Lena Smiley Lopez of EÉ-ƆƱ-LET; Frank, Fred, and Lila James Moorehead of XÓ-WUN'-GWÚT; Irene Seymour Natt of MEĆᴨ-TÉᴨ-DUN; William Roberts (Willie Bob) of TÓ-GOR'S-NO-ᴨXÚN; Anna Brown Sanderson and Harriet Brown Smith of YON'-DÓ-KUT; Ernest Scott of NÍИ-LI-ƆÚN-DUN; Ethel Moorehead Scott of XÓ-WUN'-GWÚT; Bertha Grimes Stewart of YON'-DÓ-KUT; and Letsy Brown Whipple of XÓ-WUN'-GWÚT.

CONTEMPORARY LEADERS AND CONTRIBUTORS:

Eunice Bommelyn; Loren Bommelyn; Audree Bowen; Margaret Brooks; Betty Brown; Barbara Eller; Joe Giovanetti; Betty Green; Carl James; Margaret Matthews; Darrell Moorehead; Marvin Richards; Viola Richards; Sheryl Steinruck.

Making Baskets

JE-TÓ'

The previous numbered page in
the original document was blank.

To make baskets entails a complete year to gather the materials.

- Hazel, XUN, and willow, GÉ-LIS, sticks, ɔUN, are cut in early spring when they will slip.
- Spruce roots, XI WÓN'-TRE', are dug any time of the year.
- Willow roots, GÉ-LIS WÓN'-TRE', are gathered after the river and creek water levels recede.
- Redwood roots, GÚS-ɔʊ WE-YÉ', are dug any time of the year.
- Maiden Hair Fern, GIT'Ć-T'Cʌ-SRÓ-DE', is picked from June to August.
- Bear Grass, DÓ-TEE, is pulled in August.
- Woodwardia Fern, DÓ-MUS, is cut from September to October.
- Porcupine Quills are plucked when a road kill is found.

▪ Hazel & Willow Sticks: Hazel sticks are cut from late March to early May. They can be checked periodically for slipping. The area in which they are cut must have been burnt the two falls preceding. They are cut in their second spring, when they slip good. If they are cut too early, the bark sticks, they have to be scraped, and this ruins the natural sheen they get when dry. When cut, strip the leaves from the stem then peel them from the cut end to the tip. Lay them in the grass for drying and bleaching. As they dry, straighten them. Also, twist hand-sized bundles in your hands to soften and further straighten them. Grade them into their respective sizes for future basket weaving.

▪ Willow sticks are cut in spring like hazel sticks or in August, just before their bark begins to stick. They are dried in the same manner as hazel sticks. Willow sticks are used for fine baskets. They are not strong like hazel, and break more easily.

▪ Spruce Roots: Go to the woods and find spruce trees, which usually grow in homogeneous stands. Roots grow best in rotten logs. Cook the roots in hot sand at the beach (or oven), immediately peel their bark off with a mussel shell, and split them down the middle, four ways. Then peel out the brown core and split the four quarters outward from the centers in ribbons. Scrape the "fuzz" off these ribbons with a mussel shell blade until they are smooth, softened, and strong. Then or later split into widths needed for the size and design of the desired basket.

- Redwood roots: Redwood roots are prepared in a similar fashion. They are used primarily in weaving, cooking, and eating baskets because of their superior ability to absorb and hold water.

- Willow roots: Willow roots are gathered any time in sandy spots along the river when it recedes. Their useful diameters can vary from as fine as a hair to thicker than a pencil. They usually are neither split nor cooked. They are peeled by pulling them through a split stick.

- Maidenhair Fern: Maidenhair Fern stems are picked during June and July in canyons, creeks, or any damp, deeply shaded places. If picked too early they will turn red and dry out to be brittle and break. They are dried slowly then soaked and split by pulling them through a split alder limb. Be careful of the edges, they are very sharp and can cut your fingers.

- Bear Grass: Bear Grass is pulled from the center of the plant in August. The underbrush must have been burnt the preceding year. The Bear Grass will come up in the center and stand upright. After August the plant will pop open, returning to its former shape. The best place to pull Bear Grass is in shade. Bear Grass is dried in the sun until all the moisture is gone.

- Woodwardia Fern: Woodwardia Fern stems are cut from September to October in canyons and other deep shade. These stems are stripped of their leaves and pounded. Some people wring them through a washing machine wringer so as to extract the two strips of fibre inside each stem. These are dried, then dyed in alder bark dye.

- Porcupine Quills are obtained when a road kill is found. The quills are plucked from the animal, then dyed with yellow mountain moss or Oregon grape root.

Basket weaving, among North Coast people, was one of the most essential industries in earlier times. Life could not have gone on without it. Basket weaving was, and still is, a great art.

The Tossel Stickgame = NOT'A-DUT́'A-DEA

The Tossel Stickgame is played by the women. It is played with light sticks and tossels. No hitting or poking with the stick is allowed in the game. The best two out of three wins the game. It is played with three or more players on each team.

The Stick = T'CO-XẂI

The stick is made of hazel wood. They are at least three feet long with a cylinderical curved tip. This allows the tossel to be thrown or intercepted in the air during play.

The Tossel, Tossels = NOT́'A-DEA

The tossels are made of two cylinder-shaped hazel sticks. They are about three inches long and one inch wide. They are tied together with a leather thong about three inches apart. The tossel is dropped from the mouth of the player who won the toss-up at the center of the field. The advantage allows the player dropping the tossel to throw it to toward her goal at the on-set of the game. Body restraint, westling, tripping, and body blocking is permitted.

The Ball Stickgame = T'CO-XẂE

The Ball Stickgame is played by the men with three or more players on each team. It is played with long heavy spoon shaped sticks and a ball. No poking or hitting with the sticks is permitted. The best two out of three wins the game.

The Stick = T'CO-XẂI

The stick is made of yew wood, crabapple, or any hard curley wood. It is at least three feet long. It has a pointed spoon-shaped scoop at the end. The scoop is two to three inches wide and three to four inches long. The sticks are used to parry and drive the ball. The stick can intercept the ball during play.

The Ball = SRO-WΦ́T'A

The ball is made of cedar, willow root or a fir burl soaked in oil to soften it. It should measure about four inches across. The ball is buried in the sand pit, and it is dug up by the two central players at the on-set of play. Some wrestling with the clubs is allowed. More open running is encouraged.

Men's Gambling Game

JỌT́'ᴀ-DE = cards
ƆÓ-XWUN' = the ace
ƆUN = counter sticks
TẸ́T'ᴀ-MEC = gambling tray
TÉT'ᴀ-MEC-DUN = gambling place
JỌ-BÉT'ᴀ-ƆO = deer hoof rattle
UT́'ᴀ-GOʙ = the drum
MUʙ-UT́'ʙ-GOʙ = drum stick

JOT́'ᴀ-DE are long slender carved and sanded rods. 50 to 100 JOT́'ᴀ-DE compose a deck. Each deck usually has five ƆÓ-WUN', leaving four as spares in case the ace in play is broken. JOT́'ʙ-DE are carved from Yew, Elderberry, or Ocean Spray.

ƆÓ-XWUN' is a card with a black section in the center. In the past the black section was made with blood and charcoal. While training, the inter forearm was slit. The card was rolled in the blood. Then powdered soot was rubbed into the blood and dried. This was applied to the card several times until a permanent black section was accomplished.
Today ƆÓ-XWUN' are made with paint.

TÉT'ᴀ-MEC were woven from basketry material or tanned deerskin. Close woven, patterned, circular trays were woven for card display during play. Leather trays were made of tanned deerskin. The leather was stretched over a wooden frame. When the hand was called, the dealer threw the cards down singly. The cards would individually roll to the bottom, displaying the ace when it was guessed. Today, two blankets are spread out next to one another. The guesser/dealer sits on the blanket. He throws the cards upon the blanket.

ƆUN are made by quartering a four to five inch limb section of Ocean Spray or a wood of the carver's choice. In the past twelve points were used in a game. The points were won consecutively until the end.
Today eleven points are used in a game. The points are won singly until the last two. When a team has two points left, they show them out front. The dealer of the opposite team hides his cards in three places -- in his hands and behind him. The guesser then has two guesses. He may guess either hand or straight up.

JO-BÉT'ʙ-ƆO is made of deer hooves tied to a wooden handle. JO-BÉT'ʙ-ƆO is shaken in time to the drum by a co-singer.

UT́'Ə-GOŊ are made of deer, elk or cow hide. The hide is tanned to the hair removal stage and stretched over a wooden frame. Several may have to be made in order to find one that matches the voice of the singer.

The gambling game is played by men only. They sing songs, beat the drum, and shake the deer hoof rattle in unison.

The men choose teams. They place bets at the center of the two blankets in two parallel lines. Each bet is matched dollar per dollar. The team chooses one player to sit on the blanket to be the dealer/guesser. The rest of the team sits behind him to sing, second, and support his playing. The teams flip a coin to see which side starts play.

The team which wins the toss begins to sing. The dealer picks up his cards and shuffles them. The louder he makes them sound, the better. He then puts his ace in his hand and puts them behind his back. He then separates the bundle into two parts and brings them forward. The guesser of the opposite team guesses which hand he hopes or feels the ace is in. Guessing is done in an across-the-body fashion. If the guesser feels the ace is in the dealer's right hand, he must point across with his right hand toward it. When the guess is made, the dealer throws the cards out singly or all at once. If the ace is not present, the dealer shows the ace in the other hand and the guessing team gives them a point. If the ace is present, the guesser's team begins to sing and he picks up his cards and shuffles. Eventually all eleven points will be on one side and the game is over. The stakes are double or nothing.

In the past, if a person bet all of his money away, he could bet away any personal belongings: house, canoe, wife, fishing grounds -- even bet himself into slavery. Because of these high stakes, rigorous training accompanied gambling. Each village area had its own training ground. NÍИ-LI-ƆÚN-DUN men trained at the lower riffle and Nelechundun Mountain. XǪ́-WUN'GWŲ́T men trained at the five rocks along XÓ-WUN'-DÓC-TON'. EÉ-ƆU-LET men trained on the eastern shore of Lake Earl.

Training usually lasted five days. Abstinence from sexual activity, water, and food was crucial. Men who were training remained in seclusion throughout the five days. Watery acorn broth was eaten once a day at noon for longer training periods. Each night the men steamed themselves and they bathed early every morning. Songs were sung at the prayer fires. New songs were composed during training.

Each night the trainee walked prescribed distances alone in secluded terrain. They returned to their small prayer fires and sang their gambling song. As they sang, they looked into the fire and concentrated. Near the end of the training period various powers would come and test their courage and devotion. "No matter what comes, just sit there. You will feel like your back is crawling. You will have to fight yourself with all your might. Sometimes large round red balls of fire come and sit at your side. Don't run. When you have proven your courage and devotion, one will come and instruct you how to get your luck. If you do everything just right, you will take all the money."

Women's Shell Dice Game

JUT́'A-XUT = Shell Dice Game

JUT́'A-XUT MOИ = Large points
JUT́'A-XUT MUS-XÉ-YE' = Small points

JUT́'A-XUT is a dice game played by women. No songs accompany this dice game. Bets are made the same as in the men's gambling game. The JUT́'A-XUT are made from the heart of mussel shells. There are two small and two large dice. A cloth or thin tanned deerskin is stretched over a basket or container to create a resilient playing survace.

The JUT́'A-XUT are shaken in the hands and thrown on the skin. If the large or small dice match shiny side up, a point for each is made. When all the dice are mis-matched, the deal goes to the opposite side.

There were training grounds for JUT́'A-XUT near each major village area. The most famous place was ATRUS-NÓN-T'CUN south of EÉ-ƆU-LET. "There was one woman from TÓ-OT-DUN who left the dance with a pack basket full of dentalium. Wherever she played, she was lucky."
